

# AN EXCLUSIVE INVITATION | WEDNESDAY 26 AUGUST 2026 | 10:30AM - 2:00PM (AEDT)

## TECH EVENT | INDUSTRIAL SITE VISIT - RIVIERA AUSTRALIA QLD

**Composites Australia**, in partnership with **Riviera Australia**, invites members and guests to an industrial site visit at Riviera's 16.8-hectare luxury motor yacht manufacturing facility within the Coomera Marine Precinct on the Gold Coast.

This **TECH Event** provides insight into composite manufacturing for long-life, high-performance marine structures, integrating advanced materials, production engineering, systems integration and skilled trades across a vertically coordinated manufacturing environment.

**Kyle Davison**, Director of Manufacturing, Riviera Australia, will provide an overview of Riviera's manufacturing system across its 16.8-hectare Gold Coast site, including composite hull and superstructure production, production planning, quality control, and the development and coordination of multidisciplinary trades within a large-scale manufacturing environment. The presentation will also address Riviera's internationalisation strategy, including the manufacture of luxury motor yachts for export markets worldwide. The guided facility tour will provide insight into composite hull, deck and superstructure manufacture; the integration of structural, mechanical, electrical and onboard systems; production sequencing, quality assurance and continuous improvement; and the coordination of composite fabrication, systems installation and interior fit-out across the site.

### COST:

**Members: Free**

**Non-members: \$200**

**Full-time students: \$25**

(All prices include GST)

Refreshments and networking will follow at the Riviera Yacht Club.
